

DOROTA ŻAK

SOFTWARE DEVELOPER

Software developer with an architectural background and passion and interest in graphic design.

I'm hardworking, diligent, and dedicated - all qualities I put forward in everything I do. Extremely driven to expand the possibilities of learning new things and to grow in my professional career.

My creativity and exceptional attention to detail helped me acquire knowledge of programming in C++ language and to become acquainted with web development.

I use HTML and CSS as my basic tools in creating web designs and add interactivity to them using JavaScript. As my interest in front-end development only increases, I look into other helpful tools, such as JavaScript libraries.

Because I approach new professional challenges with enthusiasm, I'm sure, I will be a great support to your team.
